NEWS RELEASE

BARNES AEROSPACE AWARDED OEM CONTRACT WITH LMI AEROSPACE

Bristol, CT, July 19, 2010 – Barnes Aerospace, a global provider of manufacturing solutions and comprehensive component overhaul and repair services and business of Barnes Group Inc. (NYSE:B), was awarded a contract with LMI Aerospace for approximately 100 components for the tailcone on the Mitsubishi Regional Jet (MRJ). This is the first contract that Barnes Aerospace has signed with LMI Aerospace and will extend through the life of the program.

The contract is expected to go into full production in July 2012 for key components, such as Muffler Skins, Baffles and Stiffeners. All components will be manufactured in Barnes Aerospace's Lansing, Michigan division, which specializes in advanced fabrication of engine and airframe components, kits and assemblies, Super Plastic Forming (SPF), and hot forming.

“Passenger traffic is expected to increase more than three times the current rate over the next 20 years with increased demand for 70- to 90-seat aircraft,” said Brent Wiberg, President, Barnes Aerospace, OEM. “To meet the anticipated production demand, we will provide a dedicated engineering team and manufacturing line within our Lansing division for this work. This will also enable us to further enhance this division's in-house capabilities related to SPF and hot forming.”
